

The P3S Committee Mission

- Offer P3S educational opportunities through conferences, workshops, and trainings;
- Recognize significant achievements in the field of P3S;
- Act as a networking forum for the P3S community;
- Provide updates on P3S regulatory and technological developments;
- Provide advice to the CWEA Technical Certification Program (TCP) Committee regarding the scope and content of examinations.

About CWEA

Founded in 1927, the California Water Environment Association (CWEA) is a not for-profit organization of over 9,000 professionals in the wastewater industry. CWEA is committed to keeping California's water clean. CWEA is a proud state member of the Water Environment Federation (WEF), which provides technical education and training for thousands of water quality professionals.

Get Involved with the Committee

Our committee is run by P3S professionals for P3S professionals. If you want to help shape the committee and learn valuable leadership skills, we are always looking for volunteers. Join us in our mission to support California's P3S community. We couldn't do it without our volunteers!

GET INVOLVED

CWEA's Pretreatment, Pollution Prevention, and Stormwater Committee (P3S)

If your job touches on Pretreatment, Pollution Prevention or Stormwater, getting involved with the P3S Committee is essential for job success! The committee is your path to professional and technical excellence through valuable education and training in source control, pollution prevention, and stormwater.

When you get involved, you get to take advantage of a number of great resources:

Annual Conference:

Attend the P3S Conference held in spring of each year. You will learn about the latest P3S developments and earn Continuing Education Units at over 40 exciting training sessions.

The Conference alternates between locations in Southern and Northern California and is a wonderful opportunity to interact with P3S professionals from across the State. Over 400 attendees, speakers, exhibitors, and CWEA staff participate each year.

Networking:

Network with the most influential and engaged professionals from around the State. Leverage our Yahoo group, Facebook page, our website or trainings to ask questions and stay informed on the latest regulatory trends, technological developments and certification opportunities to help you perform at your best. We are a community of P3S professionals and we benefit from each other's strengths. Join us!

Bi-Monthly Meetings:

Stay up to date with our bi-monthly trainings. The Committee meetings are held every other month. Each meeting is a training opportunity - with a free technical presentation - as well as an opportunity to meet other P3S professionals and interact with the P3S Committee leaders. Continuing education units are provided. Attendance can be in person or online with info on the agenda, training topic, and meeting location provided in advance.

Environmental Compliance Inspector TCP Support

We provide a multitude of trainings geared to helping you pass the technical certification programs. We also work closely with the CWEA Technical Certification Program (TCP) Committee regarding the scope and content of examinations.

Recognition of P3S Achievements:

The committee recognizes significant achievements in the P3S field through the following awards:

Facility of the Year:

The committee recognizes industrial facilities with an exemplary commitment to wastewater management and protection of our waterways.

P3S Person of the Year:

P3S professionals are recognized for exceptional achievement and contribution to the profession.

Silver Cover:

The success of the committee is dependent on our amazing network of volunteers. A small token our appreciation - the Silver Cover Award - is presented to individuals for outstanding service to the Committee.
